Description:

The First data GGe4 payment gateway can be integrated with the Magento core credit card system by setting the default gateway to First data Global Gateway e4. The module collects the credit card details, validates and passes the data to First data in a secured way.

Features:

- The module relies on Magento core credit module to collect and encrypt credit card information.
- Merchant can authorize only or authorize and capture the payment. Later can capture the amount from the module backend
- The module does not store card information anywhere to pass PCI Compliance issues
- The merchant can capture the authorized payments from the First data control panel.

Requirements & Compatibility:

- It supports on Magento 1.6, 1.7 and above.

Installation and Configuration:

✓ Download the package and unzip firstdatagge4 package.zip file and you can find firstdatagge4-1.1.2.zip and Read me_en.pdf

✓ After login to the website, go to System >>Magento Connect >>Magento Connect Manager.

✓ After selecting the patch click the “Choose File” option which you can see in the “Direct Package File Upload” in option number 2

✓ Then upload the module from your computer (firstdatagge4-1.1.2.zip) and click the “Upload” option.

✓ After successful upload of the click refresh or Check for Upgrades.

✓ Then logout from the admin panel and again login into the admin panel. Click the “Upload” option.
